BALLAD ONE DESIGN RULE

The design of the yacht shall be in accordance with the following specifications as regards the hull, rudder, propeller, ballast, deck, rig and spars, headboard, and also as regards to placing of engine, fuel and water tanks, and batteries.

No changes may be made to the underwater hull except what concerns the finish of the surface.

Hull:	In accordance with masterplug line drawing 0-55122.	
	L.O.A.:	9158 +/- 20 mm
	Max beam:	2960 +/- 10 mm
Rudder:	In accordance with drawing 0-55122.	
Propeller:	Firmly attached standard propeller (13,5" less than 15".	x 11,5") or folding propeller not
Keel weight:	1550 kgs (lead 1470 kgs, plastic/sand filling 80 kgs)	
Deck:	In accordance with drawings 0-55317 or Genoa sheet rail shall not be placed clos than in the original design. It may be leng and curve.	er to the centre line of the boat
Accomodation:	In accordance with drawings 325 / 290 and 0-55993.	
Engine:	Weight of engine shall not be less than 1 lighter engine may be allowed in case co weights are laminated into the hull in the position transversal to that. An extra batte part of the compensation weight.	rresponding compensation front part of the oil sump or in a
Tanks:	Fuel and water tanks shall be designed a drawing 0-55993.	and placed according to the
Batteries:	Batteries with a total minimum weight of a fore bunk. If batteries with less weight are from their original position, compensation shall be laminated to the hull in a similar	e used or they are removed n weight of not less than 42 kgs
Rigs and spars:	The rig shall be of masthead type with or be placed on the centre line of the boat. I of aluminium alloy. Weight of mast shall b cross-trees, fastenings for shrouds and s spinnaker boom rail with runner(s). Centre of gravity of the mast shall be not of mast foot.	Mast and boom shall be made be not less than 70 kgs incl. tays, pulleys, cleats and a
	Length of mast shall not be greater than from the mast foot all the way to the level shall not be less than 114 x 165 mm.	
	Length of cross-trees shall be at least 82 boom shall not exceed 3740 mm. All shro x 19 wire or rod, with a diameter not less respectively. The measure between the f the forside of the mast (J measure) shall be 3500 +/- 25 mm. Do	ouds and stays shall be either 1 than 6 mm and 5 mm orestay fastening in the hull and
	Profile forestay is allowed, but the same	groove and halyard shall be

	used when changing sail, and only one g Inner forestay is not allowed. Jockey pole is allowed. Twin foresail halyards are allowed.	groove shall be used by the sail.	
	Jockey pole is allowed.		
	Twin foresail balvards are allowed		
	i will foresail haryards are allowed.		
	Pulpits and lifelines shall be fitted in acc delivered from the yard.	ordance with the design, i.e. as	
Measurement marks:	Black measurement bands of 25 mm wid boom. Upper edge of lower mast band shall be the boom when boom is in horizontal po band shall be 9750 mm above upper ed from the mast top than 452 mm. Distance from inner edge of boom band	at the level of the upper edge of sition. Lower edge of upper mast ge of lower band, and not further	
Sails:	All types of sailcloth are allowed. At the International Ballad Cups, the follo measurement stamps: spinnakers and g		
	Mainsail Mainsail shall not be set beyond measure Only a trysail shall be set loose footed. Batten length is optional. Up to four batter width shall not be greater than 152 mm. headboard and the centre of the upper be than 1950 mm. The MGU measure shall not be greater measure shall not be greater than 1850 concavities of the leech shall be bridged optional. Mainsail shall be marked with the class is star unless otherwise prescribed by the Window in mainsail shall not be greater	ens may be used. Headboard Distance between the top of the patten pocket shall not be less than 1100 mm. The MGM mm. Making this measurement, . The length of the leech is insigna, a black "B" with a red national authority.	
	Headsails Genoa		
	Luff perpendicular (LP)	5610 mm	
	Height of fore triangle (IG/ISP)	11300 mm	
	Base of fore triangle (J)	3525 mm	
	The Luff, which is basis for the measurement, shall be stretched by 300 N (30 kp). The length of the leech is optional. Window in genoa shall not be greater than 205 x 965 mm.		
	When using a profile forestay LP shall be reduced by FSP being defined as the maximum chord of the cross section of the profile forestay multiplied by 2 - the chord is measured perpendicular to the longitudinal axis of the profile forestay - and the double chord measurement is rounded to the nearest capital number of centimetre. For example if the profile chord measurement is 28 mm - then LP shall be reduced by 60mm as 2x28mm = 56mm which shall be rounded to 6 cm.		
	<u>Spinnaker</u> Leech (SL) shall not be greater than	11300 mm	
	Max width (SMW)	6730 mm	

	The width at half of the height shall not be less than 75 % of the width at the foot (SMG).
Number of sails:	(Maximum number of sails carried onboard) 1 mainsail 1 trysail (heavy cloth, no battens) 5 genoas/jibs of which only 2 may have an area greater than 27 m ² 1 storm jib 2 spinnakers When a spinnaker is set, any headsail may be set flying with its tack fixed approximately in the centre-line of the boat.
Standard Equipment:	All standard equipment delivered with the boat from the yard shall be carried on board. The standard equipment includes: - 5 mattresses + cushions in cabin - all carpets (or wooden floor) - pantry incl. fuel - table (table top area not less than 0,5 m ²) - boat hook - moorings - all fixed details At the International Ballad Cups, the cushions, carpets and table may be left ashore.
Crew:	The number of crew members is optional, unless differently demanded by the sailing race authorities. At the International Ballad Cups, the maximum number of crew members is limited to six persons, including the helmsman.
Certificates:	Ballad Class Certificate is issued by the National Ballad Association. Ballad Class Certificate and Ballad One Design Rule shall be carried on board.
Alterations of the rules:	Alterations of these rules can be made, upon recommendations from any Ballad Club, at the general annual assembly of BODA (Ballad One Design Association).

The original One Design Rule was approved at the assembly in Copenhagen, January 30th 1976 and was amended by delegates from Denmark, Norway, England, Germany and Sweden in Kristinehamn, January 22th 1977.

Alterations have been made at BODA assemblies 1984, 1988, 1989, 1990, 1993, 1994, 1995, 1996 and 2000.

In 2012 BODA decided via e-mail-communication and by mutual agreement to allow all types of sailcloth and to allow the change of genuas in a race when using furling genuas.
